The Letters Editor,

Hazard Ahead

Our 'progressive' social democrat PM who clearly wants our wallets, assets and freedoms is promoting regressive socialist and fascist policies and here is why:

1. Per recent comments, there is no 30 year old Neo-Liberal movement. There is only the unchanging classical Liberal philosophy which was formalised by the Whigs as part of the bloodless revolution of 1688. It upheld the essential tenets of freedom, liberty and equality for the individual.
2. The resulting policies of non-interventionism, competition and free-trade turned a group of poor serfs into a nation of free men and little England into Great Britain.
3. Social Democratic Capitalism is nonsense. There is only Socialism. That is the same quasi-religion that has led to the deaths of millions, and tyrannical destruction of wealth in obscene proportions.
4. Market intervention by groups of social pests who have no way of valuing is meaningless. No government can control a market, ever. You, dear reader through your individual actions control the market and resulting prices.
5. You are now living the mess called the 'Global Financial Crisis' that these same pests created. Do you really believe that the tenets of freedom, liberty and equality generate a depression? That hard work and saving wealth lengthens a depression?

Our PM turns his back on the foundation of our prosperity. The best actions this pest can do are to deliver us honest money, a productive job in private enterprise and enforce our laws. That is all. The rest of life is up to us.
